

- THIRD EUROPEAN IUE CONFERENCE -

This is the first announcement of a third European IUE Conference which will be held next spring (tentatively May 4-6, 1982) in Madrid. The Conference will be co-sponsored by ESA and CSIC (Consejo Superior de Investigación Científica, Spain). It will be jointly organized by the IUE Observatory, VILSPA, and the Instituto de Optica, "Daza Valdés", Madrid.

After four years of successful operations we think it will be possible to assess the impact of IUE on different astrophysical fields. Priority will be given, therefore, to review papers and to recent theoretical work based on UV data. Shorter papers are also welcome and, depending on their number, they will be presented in parallel and/or poster sessions. All the papers will be included into the Conference Proceedings. The deadline for presentation of the abstracts is January 31st, 1982.

It is intended to publish the Proceedings within few months, as it was successfully achieved for the previous Tübingen IUE Conference.

If you wish to receive further information, please fill in the attached questionnaire and return it before the end of September, 1981. I will appreciate if you would give the widest possible diffusion to the present announcement.

Looking forward to a lively and pleasant Conference,

P. Benvenuti

P. Benvenuti
IUE Observatory Controller
