

IUE Observatory Schedule

Schedules for October 1981 through March 1982 follow. The date, local time, observer's name, program identification code, and staff members' initials are listed for each shift.

The March schedule is incomplete as of the end of January. The remaining shifts will be scheduled with proposals awarded observing time during the fifth episode and a few Observatory Director's discretionary time proposals. The schedule for April will likewise be distributed as soon as possible after proposals are awarded. Observers who have special scheduling requests, especially concerning March and April, are advised to write or call me (or any RA) to assure being scheduled according to your wishes.

IUE Scheduling Request Form

Date:

Principal Investigator:

Program:

Special scheduling request:

- time critical observations
- variability monitoring
- collaborative exposures
- alignment of object within aperture
important (please give required position angle below)
- coordinated ground-based observations
- contiguous US1 and US2 shifts preferred
- more than one observing run preferred
- other (specify)

Please give details below. If a certain date is required please indicate the size of a window that would be acceptable.

Please send to: C.L. Imhoff
