

Sixth Year IUE Guest Observer Proposal Instructions

Instruction packages describing proposal requirements for the sixth year of IUE operations are now available from the IUE Operations Scientist. These instructions are somewhat changed from those of previous years. All prospective proposers should obtain a current instruction package.

The IUE Project also announces that this year it is pleased to review proposals and (on a limited basis) consider funding requests from scientists proposing research with existing IUE data only (i.e., research not requiring observing time). Details will be provided with the proposal instruction package. Interested parties should write to:
