

Goddard Space Flight Center Recognizes Contributions  
of the IUE Observatory Staffs

At its annual awards ceremony last December, the Goddard Space Flight Center (GSFC) gave formal recognition to the significant contributions of the IUE Observatory's Science Operations Center and Operations Control Center staffs. These staffs are provided by Computer Sciences Corporation (CSC) and Bendix Field Engineering Corporation, respectively. Each group was presented with GSFC's Group Achievement Award in recognition of sustained and dedicated contributions to the success of the IUE mission.

Individual recognition was also accorded to Drs. Albert V. Holm and Barry E. Turnrose, both of CSC. Each received GSFC's Outstanding Service Award in recognition of exceptional contributions to the continuing success of the IUE science operation.

The NASA IUE Project is pleased to see these groups and individuals recognized by the Center for their work.

Keith Kalinowski  
IUE Operations Scientist
