

RELOCATION OF IUE OBSERVATORY OFFICES

Due to a rearrangement of Goddard's Laboratory of Astronomy and Solar Physics, many of the IUE staff offices have been relocated. The following IUE groups may be found at the locations and phone numbers listed below. Some staff members, including the RDAF staff, have moved to a trailer at the west end of the Building 21 parking lot. Other groups, including those working on image processing, calibration, and software development, have moved to the new GreenTec facility, which is located down the street from Goddard. The Resident Astronomers, observing room, Guest Observer office, and Data Management Center remain in Building 21, with some rearrangement.

Mail may continue to be sent to Code 684 (for Dr. Kondo and Dr. West) and Code 684.9 (for the other IUE staff members), Goddard Space Flight Center, Greenbelt, Maryland 20771. Express courier packages should include Building 21, Room G61 in the address. Items for staff members now located at GreenTec are forwarded promptly to that facility. In addition, the address of the GreenTec facility is 10,000-A Aerospace Road, Lanham-Seabrook, Maryland 20706.

Please call Mona Drexler, the IUE secretary, for assistance in obtaining additional telephone numbers and other information. Please note that some additional telephone number changes in Building 21 are expected in the near future. In addition, the RDAF terminal room will be relocated to Room G33 in Building 21 sometime this winter.
